<ul style="list-style-type: none">• Background/situation• Purpose and Objectives• Governance and who was involved• Indicators and questionnaire• Sampling methodology• Data Collection• Data collection systems and quality control• Challenges	<ul style="list-style-type: none">• HH Characteristics• Health & Nutrition• WASH• EDUCATION• PROTECTION

1- Background - situation

495,000 Poor Lebanese

270,000 Palestinian Refugees in Lebanon

45,000 Palestinian Refugees from Syria

1,048,000 Registered Syrian Refugees

Syrian Refugees

1- Lack of updated information on the situation of children and women

 MICS 2009

 SURVEY ON THE
SOCIOECONOMIC STATUS
OF PALESTINE REFUGEES

 Vulnerability Assessment of
Syrian Refugees (VASyR) in Lebanon

 **REACH** Informing
more effective
humanitarian action

 DEFINING COMMUNITY VULNERABILITIES IN LEBANON

- Existing assessments were targeting mainly Syrians and Palestinians
- Obsolete figures since MICS 2009 on the situation of children and women for the Lebanese population

1- Background - situation

1. **No population census** available in Lebanon (since 1932)
2. **No updated frame** of apartments/dwellings - last updated in 2004.
3. **No comprehensive survey** was done on Lebanese similar to the Syrian or Palestinian
4. **Updated information on the situation of children and women was needed** to feed into the UNICEF and GoL cooperation plan 2017-2020

2- Purpose and Objectives

Provide overview on situation of children and women in Lebanon

Provide comparable information at governorate levels between different cohorts

Provide solid base for UNICEF planning and for others stakeholders

Baseline data for UNICEF country programme 2017-2020 for all population groups

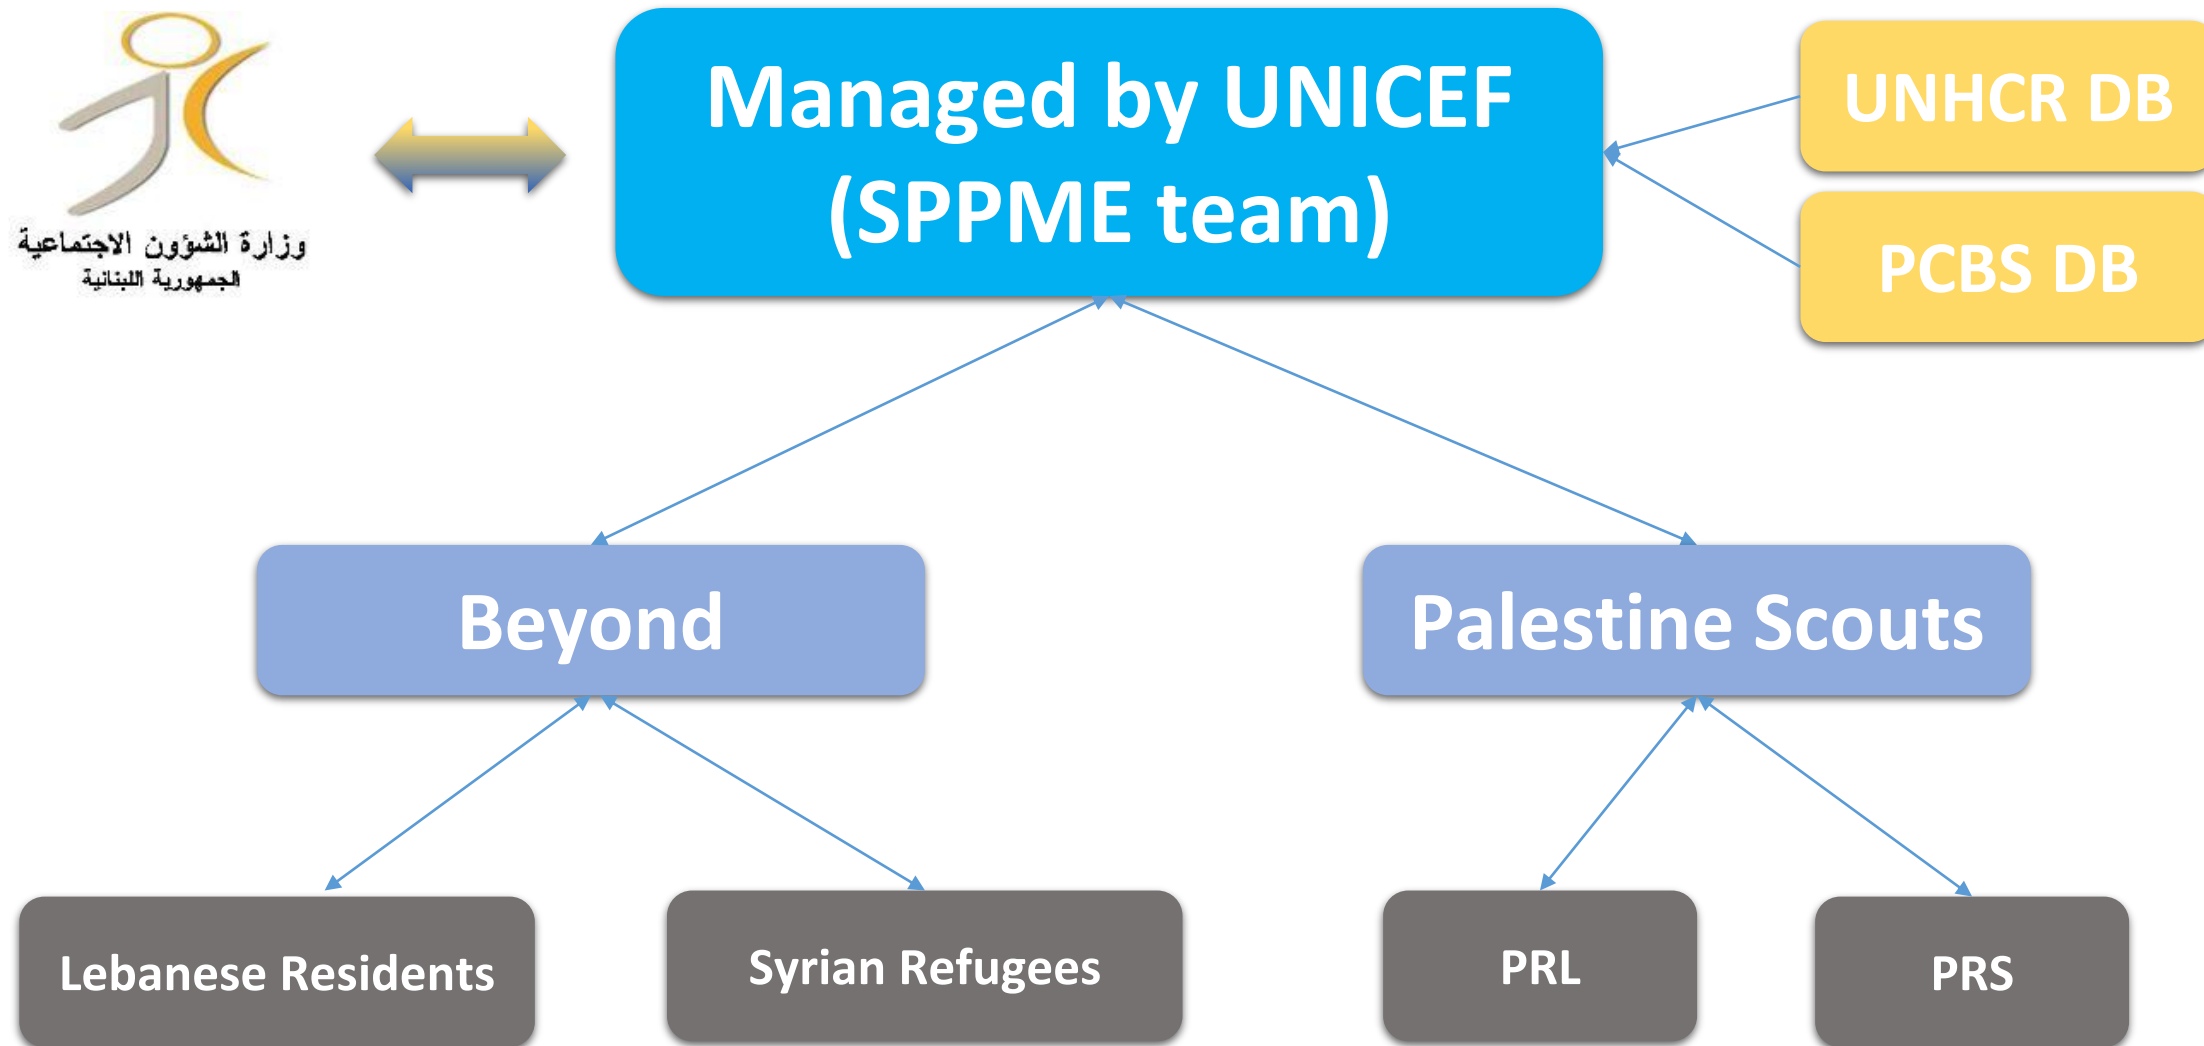

3- Governance structure

Collaboration

- Assess the situation of children and women in Lebanon of all population cohorts
- **Inform** future policies and strategies based on the findings
- Facilitate the implementation of the survey

3- Governance structure

4- Indicators and questionnaire

Standard MICS questionnaire was utilized with review from sector and consultation with MOSA

Household Questionnaire

- Household Information Panel
- List of Household Members
- Education
- Child Discipline
- Household Characteristics
- Water and Sanitation
- Child labour

4- Indicators and questionnaire

Questionnaire for Individual Women (15-49)

- Woman's Information Panel
- Woman's Background
- Access to Mass Media and Use of Information and Communication Technology
- Attitudes toward Domestic Violence
- Fertility/CM
- Union/marriage

4- Indicators and questionnaire

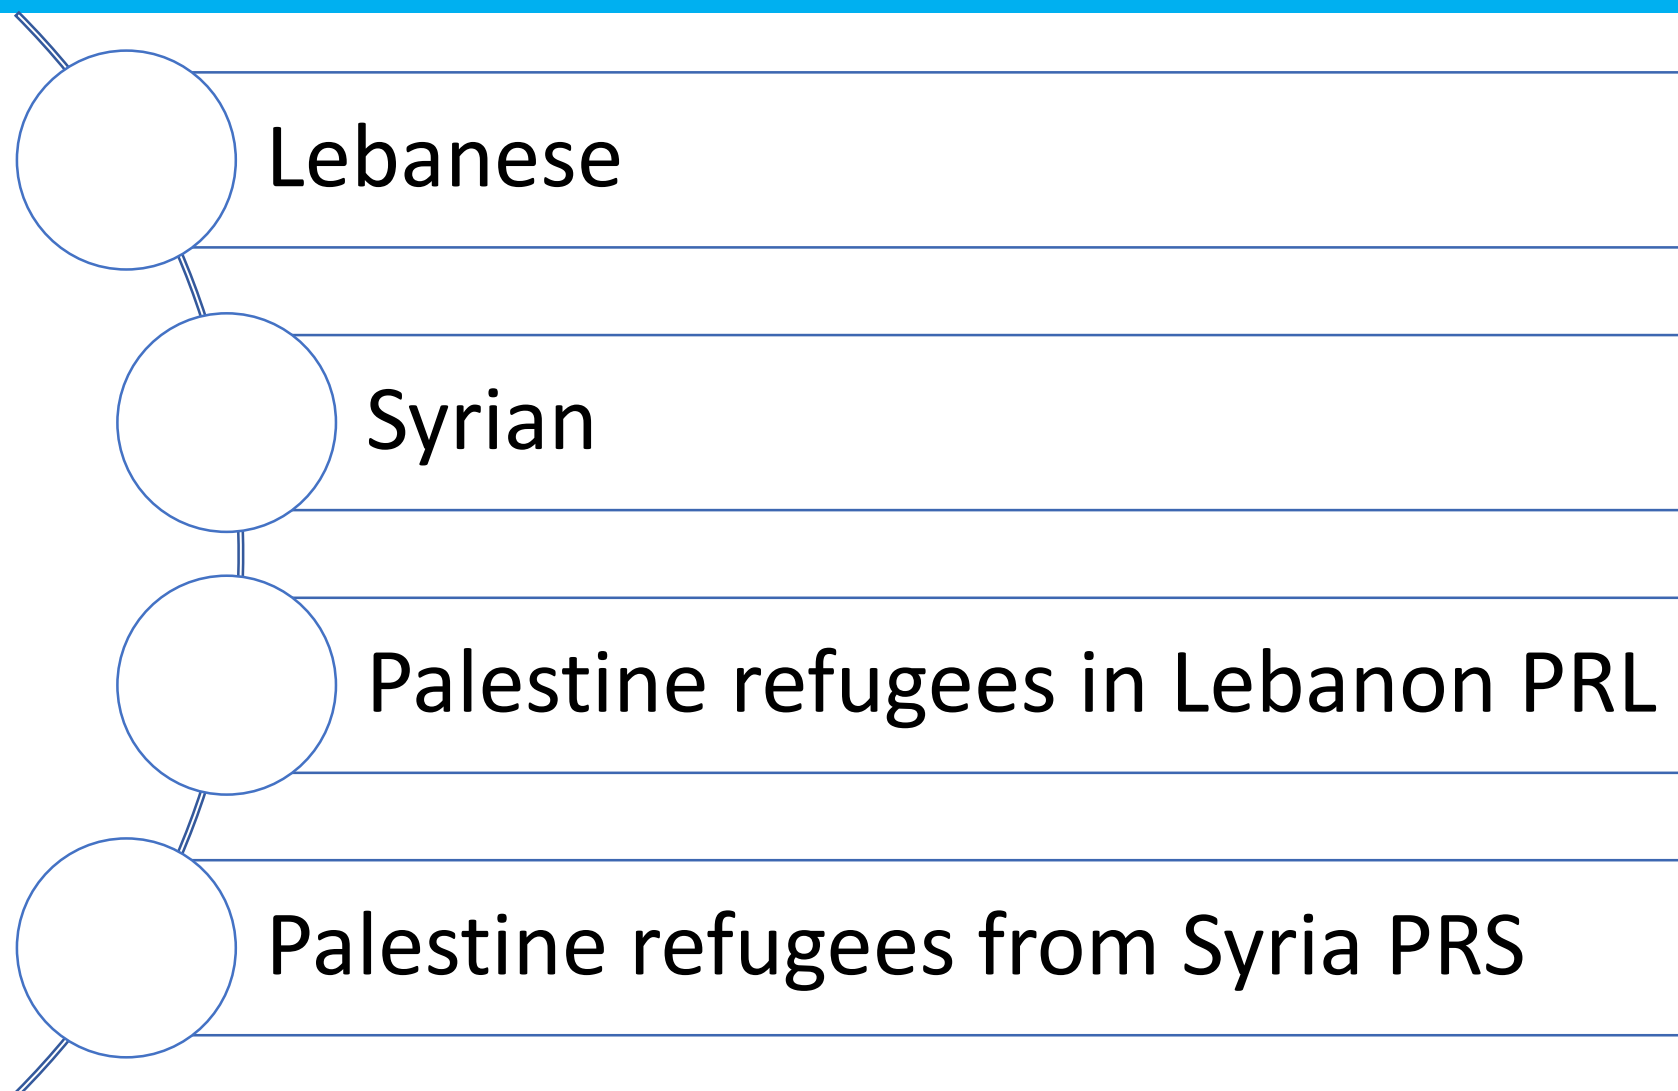

Questionnaire for Children Under Five

- Under Five Child Information Panel
 - Age
 - Birth Registration
 - Breastfeeding
 - Immunization
 - Care Of Illness
-

5- Sampling methodology

4 Population cohorts

Total 23,580 HH

Stratification by Governorate for Lebanese and Syrians

Residents of Lebanon Sample Size

Sample size was calculated based on diarrhoea indicator
(MICS 2009)

$$n = [3.84 (r) (1 - r) (f)] / [(.3r)^2 (p) (nh) (.89)]$$

Mohafaza		
# sample HH per cluster	# HH	# clusters
30	1590	53
TOTALS	12,720	424

5- Sampling methodology

Residents of Lebanon Sample Size

1st stage sampling:

Utilization of the layer of the cadasters with the counts of dwellings

2nd stage sampling:

Utilization of the layer of the cadasters with the counts of dwellings

Lack of comprehensive sample frame with a Dwelling census updated in 2004

5- Sampling methodology

Residents of Lebanon Sample Size

The 36 buildings were systematically listed:

- Number of floors,
- Number of apartments per floor
- Flat at ground floor or subsidiary.

Allowing the calculation of a number of dwelling from which to select 30 HHs randomly

5- Sampling methodology

PRL Sample Size	PRS Sample Size
Probability Proportionate to Size PPS Sampling methodology. Same design as for the PRL MICS 2011	Systematic Random sampling (within communes > 25 HHs)
20 HH * 260 Ilots = 5,200 HH In 5 domains	20HH * 115 Ilots = 2,300 HH In 5 domains

6- Data collection

28 teams in total

- 16 for Residents of Lebanon and Syrian Refugees
- 12 teams for PRL, PRS

6- Data collection

Tablets

CSPro

Relevant dictionaries and validation routines developed by the Global MICS programme. This ensured:

- Efficient field work management
- Daily tracking of progress
- Day-to-day Synchronization with the central computer
- Quality check and feedback

7- Quality control

9 days training: Enumerators, supervisors, pilot day, debriefing day.

CSPro menu control for administering, and validation of the interview on the fly

Data uploaded on daily basis

Follow up on daily basis by IMO on field level

Daily feedback to teams' supervisors based on field check tables

8- Challenges and Limitations

- Security events mitigated access and prolonged the fieldwork
- Specific local level consultations were required which further delayed fieldwork in some areas
- Challenging workload on supervisors in terms of navigating, listing, sampling and managing enumerators
- No access to some areas in Beirut, Mt Lebanon and South thus were not covered
- Movement of Syrian refugee population and the inaccuracy of the phone numbers required resampled lists from UNHCR
- Similarly, PRS required resampled lists from UNRWA listing
- Representativeness of the findings has to be analyzed with the backdrop of the above challenges
