EDITORIAL NOTE MINISTER OF ECONOMY AND TRADE

Despite a significantly challenging political context, which hinders and interferes with the regulatory work, the Insurance Control Commission managed to deliver an excellent performance, which was materialised in a number of achievements.

An analysis of the exposure to earthquake risks was completed, and its results will be made public shortly. The analysis measures the exposure of the insurance sector taking into consideration the existing reinsurance programs. It also quantifies the exposure of the governmental budget in case of a major earthquake. The analysis proposes recommendations for a structured hedging program to mitigate this exposure.

The Insurance Control Commission worked closely with the Capital Market Authority in order to align supervisory roles in respect of financial instruments included in insurance contracts, in compliance with Article 53 of Law 161 relative to the work of the Capital Market Authority, and in line with the Commission's role as per the prevailing insurance regulations stipulated in Decree 9812 and its amendments.

In parallel, the Commission issued guidelines on the review of insurance products in line with Insurance Core Principles and to provide context for its supervisory work in this domain. The review process is based on the concept of "file and use" and attempts primarily to ensure that companies have strong governance and apply sound principles in the course of launching new insurance products or amending existing ones.

A project to strengthen the supervision and regulation of the insurance sector kicked-off. This project takes place within the context of technical assistance to the ICC for the development of a sound subsidiary regulatory framework for the implementation of a new compulsory motor insurance product covering property damage, and the strengthening of risk-based supervision, provided through funding from FIRST (Financial Sector Reform and Strengthening Initiative).

Despite sustained resilience, the development of the insurance sector continues to be hindered by a number

of structural factors, stemming primarily from the inability to modernise insurance regulations, a reform that would lead to a much needed strengthening of solvency requirements. While the Commission is dealing adequately with this legislative handicap, the market structure remains challenging with a large number of operating insurance companies. Expert resources, which are already scarce in the country and in the Middle-East region as a whole, are diluted in this context. The continuous difference in performance and behaviour among the different insurance companies is increasingly widening, and it is more and more challenging to narrow down the gap.

As highlighted in the recent limited scope Financial Services Assessment Program performed by the WorldBank, the sector is developing mainly by an evolutionary process rather than through innovation. Insurers tend to have business models focused on organic growth of successful operations and approaches. In the absence of external initiatives, future development is expected to focus on refining current practices organically. This suggests that the sector is better placed to react to change than to initiate it, and looks to external initiatives for change to a greater extent. Being cautious about change, and conservative in experimenting, has the advantage of minimizing the risk of loss through unsuccessful initiatives. However, reacting to rather than anticipating adverse developments can, and has meant, that foreseeable losses could have been reduced.

Key initiatives directed at improvement would need to be integrated with the supervisory work. In the near future, this would involve the organisation of the insurance mediation profession in line with modern best practices, and the acceleration of the Commission's efforts to reinforce the prudential regulatory framework.

The Minister of Economy and Trade **Dr Alain Hakim**

EDITORIAL NOTE – ACTING HEAD OF THE ICC

While the insurance sector in Lebanon continues to achieve growth and profitability at levels that can be considered acceptable in view of the prevailing economic environment, the penetration rate remains small by international standards, reaching 0.9% for life and 2.3% for non-life insurance. Growth potential in the market is still significant.

Life insurance premiums increased from 616b to 643b LBP between 2013 and 2014, achieving a top line growth of 4.3%, while net profits increased from 124b to 143b LBP. Profit margins in life insurance remain at comfortable levels in excess of 20%. In comparison, non-life insurance grew by 4.1% in terms of premiums between 2013 and 2014 reaching 1,581b LBP, with a relatively low level of profitability that did not exceed 4.4% in 2014 despite an improvement as compared with the 2.9% margin achieved in 2013.

The insurance sector did not reach yet a size where it would play a major role as an institutional investor. The absence of public and private pension regulations, coupled with the lack of fiscal incentives represent strong structural challenges in the long term. A significant medical insurance activity is taking place in mutual funds, and lacks proper governance and supervision. This represents a serious threat in the medium term, as these funds are expected to face solvency issues with the increasing challenges in managing and forecasting healthcare expenditures. This matter is exacerbating price competition, which seems to go on without scientific basis, pulling down the overall performance of the sector.

The motor non-compulsory business continues to be hindered by price competition. The level of commissions settled to insurance intermediaries remains high, reaching 26% in 2014. In the own damage line, loss ratio was 62% for accident year 2014, while the expense ratio was at 15%, which indicates that technical losses are driven by high intermediation and acquisition costs. The situation in the third party liability line is made worse with a loss ratio reaching 75% for accident year 2014, although the ratio is expected to drop after companies realise their recoveries. Motor

compulsory needs to be extended to cover material damage to all vehicles registered in Lebanon as stipulated in the new Traffic Law.

On another front, household insurance penetration is estimated to range between 10% and 15% of the insurable stock of houses, leaving significant potential for growth. The average standard rate on property insurance is under pressure, while being restrained by the minimum premium for natural disasters risks as required by reinsurance companies. Workmen's compensation, although required by virtue of the Labour Law in Lebanon, remains largely neglected by employers.

The level of available shareholders equity increased from 1,479b to 1,589b LBP, implying "equity to premium ratio" of 71.5%. At a similar level of capitalisation, the sector has the ability to grow substantially more. Nevertheless, there continues to be strong reliance on reinsurance companies in all lines of business. Separately, significant disparities exist between the various players primarily in terms of financial condition, governance, strategic decision-making, pricing, and general market conduct. This has an adverse broad impact on the sector.

The above represents challenges that the Commission needs to overcome with the cooperation of the sector: only a joint collective effort can bear fruits in the present context where the political process, which would be relied upon under normal circumstances to achieve a quick modernisation of insurance regulations, faces major deadlocks. The supervisory work will continue to move forward nevertheless, namely through limited scope guidelines, and continuous improvements to the financial reporting framework and supervisory capacity building. The ICC would further focus over the coming period on the organisation of the insurance mediation profession, the implementation of the framework for motor third party liability insurance covering both bodily injury and material damage claims, and the design and implementation of a framework to assess the financial condition of insurance companies.

I would take this opportunity to present my grateful thoughts to the Commission's team and experts, for their hard work and continued dedication.

Acting Head of the Insurance Control Commission Nadine El-Habbal

(Habbal

| (m LBP) | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 |
|-------------------------------------|---------|---------|---------|---------|---------|---------|---------|---------|
| Gross Paid Claims (Life) | 90,185 | 111,947 | 160,053 | 115,866 | 173,529 | 237,099 | 266,187 | 297,307 |
| Gross Paid Claims (Non-Life) | 392,420 | 450,746 | 535,264 | 643,241 | 743,654 | 761,870 | 840,084 | 853,396 |

FOCUS ON LIFE INSURANCE

1. OVERVIEW

The present section of the Annual Report exhibits the review of the performance of the life insurance sector in Lebanon. The review considered the entire life insurance portfolios and did not distinguish between the various sub-lines of life insurance, namely the Protection, Savings, and Unit-Linked. This choice of presentation was driven by the challenges in segregating the data available in the regulatory forms filed by the Companies.

2. KEY PERFORMANCE INDICATORS

The following table presents the key quantitative indicators for the six years 2009, 2010, 2011, 2012, 2013 and 2014. Amounts are shown in million LBP.

Table 1: Key Performance Indicators

| (m LBP) | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | CAGR |
|-------------------------------------|-----------|-----------|-----------|-----------|-----------|-----------|-------|
| Gross written premiums | 447,514 | 506,583 | 549,221 | 573,295 | 616,096 | 642,531 | 7.5% |
| Ceded premiums | 61,544 | 82,188 | 81,613 | 79,727 | 87,162 | 91,017 | 8.1% |
| Claims paid | 160,053 | 115,866 | 173,529 | 237,099 | 266,187 | 297,307 | 13.2% |
| Insurance liabilities | 1,576,977 | 1,878,715 | 2,103,413 | 2,303,815 | 2,545,893 | 2,750,242 | 11.8% |
| Net income after tax | 93,257 | 86,940 | 96,970 | 114,967 | 124,446 | 143,438 | 9.0% |
| Acquisition Costs | 44,208 | 54,651 | 60,100 | 66,556 | 73,065 | 78,027 | 12.0% |
| OPEX . | 44,630 | 48,808 | 52,991 | 57,988 | 62,159 | 65,270 | 7.9% |
| Income Taxes | 6,918 | 10,077 | 8,058 | 9,286 | 11,575 | 7,367 | 1.3% |
| Annualized premium equivalent (APE) | 356,920 | 401,467 | 443,456 | 503,118 | 535,858 | 553,724 | 9.2% |

2.1. Gross Written Premiums

The Gross Written Premium grew by 13.2% in 2010, 8.4% in 2011, 4.4% in 2012, 7.5% in 2013, and 4.3% in 2014. The Compounded Annual Growth Rate (CAGR) between 2009 and 2014 reached 7.5%, whereby the premiums increased from 447,514 up to 642,531 M LBP.

Gross Written Premiums include New Business as well as Renewals. Regular and Single life insurance premiums are added together in this indicator, which means that in years where the production of Single Premiums is high, we would see a high level of growth, while in years where the production of Single Premiums is low, the pattern would be somewhat lower. In other terms, this indicator does not provide a picture of the effective growth in the business due to the distortion introduced by Single Premiums.

2.2. Annualised Premium Equivalent

Annualised Premium Equivalent (APE) combines the Regular Premiums to one-tenth of the Single Premiums alleviating to some extent the distortion described above. APE is a standard market indicator widely used in disclosures made by insurance companies to financial markets.

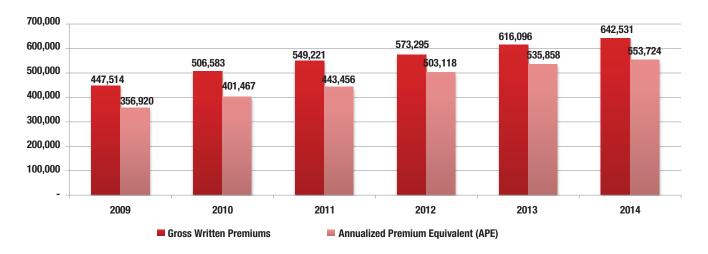

As an indicator of growth, APE is superior to Gross Written Premium. It limits the distortions caused by the issuance of large amounts of single premiums by spreading them over a period of time of 10 years. The corresponding one-tenth factor applied to Single Premiums is also a standard ratio and has been used as such across various markets.

APE increased from 356,920 M LBP in 2009 to 401,467 M LBP in 2010 and 443,456 M LBP in 2011 and 503,118 M LBP in 2012 and 535,858 M LBP in 2013 and 553,724 M LBP in 2014, achieving hence a CAGR of 9.2% over 2009 – 2014. The APE

growth was 12.4% in 2010, 10.5% in 2011, 13.5% in 2012, 6.5% in 2013 and 3.3% in 2014, respectively higher and lower than the growth recorded in Gross Written Premiums in the same years.

The Gross Written Premiums and APE growth pattern is shown in the graph below.

Figure 1: The Gross Written Premiums and the Annualized Premium Equivalent in Lebanon (in M LBP)

2.3. Insurance Liabilities

Insurance Liabilities account for all technical provisions booked on behalf of life insurance policies in force. The Insurance Liabilities represent the amount that the insurance companies set aside to cover future claims and related expenditures.

The growth of insurance liabilities is mainly driven by savings plans, and consequently presents an indicator of the level of long term savings in the life insurance business produced in Lebanon.

The growth of Insurance Liabilities was 19.1% in 2010 and decreased in 2011, 2012, 2013 and 2014: it reached 12.0% in 2011, 9.5% in 2012, 10.5% in 2013 and 8.0% in 2014, with an overall CAGR of 11.8%. The amount of insurance liabilities rose from 1,576 to 2,750 bn LBP between 2009 and 2014.

3. KEY PERFORMANCE RATIOS

3.1. Definitions

The following measures are calculated for each indicator:

Mean ratio

This represents the average market ratio.

Median ratio

This is the middle ratio in a sorted (low to high) array of ratios; 50% of the insurance company's ratios lie above the median and 50% fall below it. The median ratio is the most commonly used point estimate because it is less influenced by outliers.

18 Companies have a ratio between

This is an interval where 50% of the companies would have a ratio between the lower and upper boundaries; in other terms, 25% of the companies have a ratio greater than the upper limit of the interval, and 25% have a ratio below the lower limit of that same interval.

27 Companies have a ratio between

This is an interval where 75% of the companies would have a ratio between the lower and upper boundaries; in other terms, 12.5% of the companies have a ratio greater than the upper limit of the interval, and 12.5% have a ratio below the lower limit of that same interval.

3.2. Profit / APE Ratio

This ratio indicates the level of the profit or loss of the insurance companies relative to its Annualized Premiums Equivalent. It is a performance measure calculated as the Net Income after Tax (profit) divided by the Annualized Premiums Equivalent (APE). Net Income after Tax represents the profit of the Insurance Company as reported in its audited regulatory forms submitted to the Insurance Control Commission.

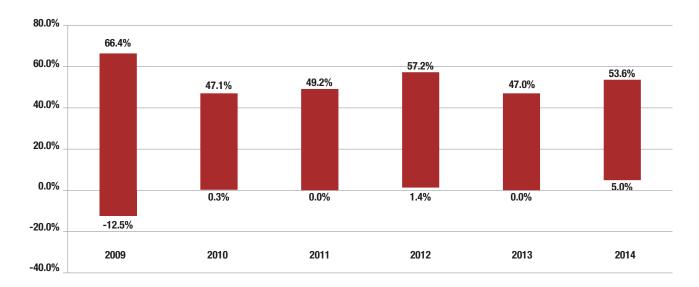

Table 2: Profit / APE Ratio

| Profit / APE | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 |
|-----------------------------------|--------|-------|-------|-------|-------|-------|
| Mean ratio | 26.1% | 21.7% | 21.9% | 22.9% | 23.2% | 25.9% |
| Median ratio | 23.8% | 17.5% | 18.8% | 23.2% | 14.9% | 20.0% |
| 10 componico hava a vatia batuvan | 10.8% | 7.5% | 7.7% | 10.1% | 6.0% | 10.8% |
| 18 companies have a ratio between | 47.9% | 25.0% | 33.4% | 34.3% | 35.6% | 37.1% |
| 27 companies have a vatic between | -12.5% | 0.3% | 0.0% | 1.4% | 0.0% | 5.0% |
| 27 companies have a ratio between | 66.4% | 47.1% | 49.2% | 57.2% | 47.0% | 53.6% |

The table above shows that the median ratio decreased year-on-year from 23.8% in 2009 to 18.8% in 2011 and to 14.9% in 2013 and rise up to 20.0% in 2014, while the mean ratio decreased from 26.1% in 2009 to 21.9% in 2011 and rise up to 25.9% in 2014.

In 2014, 75% of the companies were successful in generating a profit; they have a profit / APE ratio between 5.0% and 53.6%.

Figure 2: Profit / APE Ratios

The figure above indicates that 27 companies, out of a total of 36 companies operating in the life insurance business, are more tightly clustered around the median and the mean ratio in 2010, 2011, 2012, 2013 and 2014 than previous years. This may indicate that the performance of the Companies is getting closer to each other in comparison with previous years, although in absolute terms, a large gap still exists.

3.3. Profit / Insurance Liabilities Ratio

This ratio is calculated as the Net Income after Tax divided by the Insurance Liabilities at year-end. The savings activity in life insurance is, to some extent, closer to banking than to income protection, as insurance companies earn their revenue through a variety of charges which are partially based on the reserves, i.e. the funds under management. As these funds grow, the corresponding charges gain in importance and would ultimately become the main driver of revenue. Hence, the importance of considering this ratio, which provides an important benchmark for the performance of the life insurance business.

| Ī | Tahle | 3. | Profit | / Inquirance | Liabilities Rati | in |
|---|---------|-------|-----------------|--------------|------------------|------|
| | י אונאו | .) . | 1 1 () 1 1 1 / | THOU GIVE | ומטווווסס דומו | 11.7 |

| Profit / Insurance liabilities | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 |
|-----------------------------------|-------|-------|-------|-------|-------|-------|
| Mean ratio | 5.9% | 4.6% | 4.6% | 5.0% | 4.9% | 5.2% |
| Median ratio | 7.6% | 7.0% | 7.2% | 16.8% | 6.7% | 11.3% |
| 10 companies bays a vatic between | 4.1% | 1.8% | 2.2% | 4.2% | 3.1% | 4.9% |
| 18 companies have a ratio between | 36.0% | 15.3% | 22.6% | 28.9% | 17.9% | 24.3% |
| 07 commonica have a vatic batusan | -2.9% | 0.0% | 0.0% | 0.4% | 0.0% | 1.9% |
| 27 companies have a ratio between | 75.2% | 29.3% | 44.7% | 54.9% | 39.6% | 46.1% |

The table above shows that the median ratio decreases from 7.6% in 2009 to 7.2% in 2011 and increases to 11.3% in 2014; in the same time, the market ratio (or mean ratio) was more stable moving from 4.6% in 2010 to 5.2% in 2014. While the mean ratio is reasonably stable, the relative performance of the companies is not homogeneous, with considerable disparities being recorded. In 2014 for instance, this ratio ranged between 1.9% and 46.1% for a range of 27 companies.

3.4. Acquisition Cost / APE Ratio

This ratio is a performance measure that quantifies the total cost of acquiring the business as a proportion of Annualized Premiums Equivalent. It measures a company's operational efficiency in producing and underwriting its insurance business. It provides an indication of the commissioning rate in the market relative to the size of premiums. The numerator of the ratio includes Brokerage fees, changes in Deferred Acquisition Costs, and other acquisition costs.

Table 4: Acquisition Cost / APE Ratio

| Acquisition cost / APE | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 |
|-----------------------------------|-------|-------|-------|-------|-------|-------|
| Mean ratio | 12.4% | 13.6% | 13.6% | 13.2% | 13.6% | 14.1% |
| Median ratio | 13.9% | 14.8% | 13.9% | 13.7% | 14.7% | 12.1% |
| | 5.0% | 6.0% | 5.2% | 7.6% | 6.5% | 6.2% |
| 18 companies have a ratio between | 18.5% | 28.2% | 27.5% | 20.2% | 22.0% | 22.1% |
| 27 companies have a vatic between | 0.6% | 0.5% | 0.5% | 1.2% | 1.4% | 3.1% |
| 27 companies have a ratio between | 31.4% | 41.6% | 32.3% | 34.4% | 37.4% | 28.7% |

Over the past six years, the median Acquisition cost ratio over the Annualized Premium Equivalent increased from 13.9% in 2009 to 14.8% in 2010 and fell back to 12.1% in 2014 while the mean ratio remained reasonably stable. The mean value of the Acquisition Cost ratio is negatively correlated to the profit ratio; a lower Acquisition Cost ratio indicates larger profits for the companies.

3.5. OPEX / APE Ratio

This ratio indicates the level of Operational Expenses (OPEX) relative to the Annualized Premiums Equivalent (APE). The OPEX includes the administration cost, taxes licenses and associated fees, and other expenses incurred by the insurance company excluding acquisition costs. This ratio helps assess the sector's ability to manage expenses, in order to maximize underwriting results and improve its business.

Table 5: OPEX / APE Ratio

| OPEX / APE | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 |
|-----------------------------------|-------|-------|-------|-------|-------|-------|
| Mean ratio | 12.5% | 12.2% | 11.9% | 11.5% | 11.6% | 11.8% |
| Median ratio | 18.0% | 16.7% | 15.5% | 14.6% | 14.2% | 12.8% |
| 10 companies have a vatic between | 13.1% | 10.5% | 8.7% | 9.0% | 8.8% | 8.6% |
| 18 companies have a ratio between | 23.9% | 26.0% | 24.9% | 22.4% | 22.0% | 18.8% |
| 27 companies have a vatic between | 8.5% | 8.6% | 6.3% | 3.2% | 0.7% | 1.9% |
| 27 companies have a ratio between | 30.7% | 35.8% | 29.6% | 27.9% | 25.7% | 27.1% |

The table above shows that the OPEX / APE mean ratio in life insurance market decreased over the four years 2009-2012 and increased to reach 11.8% in 2014.

3.6. Ceded Premium / APE

This ratio indicates the level of the insurance premiums outflow from the insurance company to the reinsurers. Life insurance is typically a risk that is well understood and quantified. Therefore, its retention by Companies does not pose material problems unless the Company is a start-up or very small.

Proportional reinsurance is typically an elementary hedging strategy in life insurance; conversely, surplus reinsurance programmes should be contemplated. Hence, if the insurance company cedes large amounts of its premiums, we have an indication that the reinsurance hedging is not optimised.

In the context of Lebanon, Companies pay a tax of 2.25% of the premium ceded to foreign reinsurance companies. Therefore, large cessions have also an impact on the bottom lines of the Companies.

Table 6: Ceded Premium / APF Ratio

| Ceded premiums / APE | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 |
|-----------------------------------|-------|-------|-------|-------|-------|-------|
| Mean ratio | 17.2% | 20.5% | 18.4% | 15.8% | 16.3% | 16.4% |
| Median ratio | 33.9% | 32.4% | 31.1% | 25.0% | 27.7% | 26.3% |
| | 13.5% | 15.9% | 14.2% | 15.0% | 16.2% | 16.5% |
| 18 companies have a ratio between | 45.8% | 48.9% | 43.8% | 40.3% | 42.2% | 45.1% |
| 27 companies have a vatic between | 6.6% | 8.2% | 4.9% | 5.8% | 6.3% | 6.4% |
| 27 companies have a ratio between | 71.0% | 79.9% | 57.0% | 50.7% | 48.6% | 62.4% |

The market ratio increased from 17.2% in 2009 to 20.5% in 2010 and then went down to 16.4% in 2014. It is expected that, as the market grows, life reinsurance would diminish due to larger retention capacity, unless the average sum insured increases faster than the retention limits in the reinsurance treaties. The table above shows that some insurance companies have a very high ratio of ceded premium over APE, which reached 62.4% in 2014. This was remarkably lower than the highest level observed in 2010, which was around 80%.

The table above shows that 27 companies, out of a total of 36 companies operating in the life insurance business, are more tightly clustered around the median and the mean ratio in 2011, 2012, 2013 and in 2014 than in previous years.

FOCUS ON MOTOR AND MEDICAL INSURANCE

| CONTENTS | |
|--|----|
| | |
| Motor Compulsory | 42 |
| Motor Third Party Liability | 44 |
| Motor Own Damage and Other Complementary Risks | 46 |
| Individual Health | 48 |
| Group Health | 50 |
| | |

The present section of the Annual Report provides an overview of the main performance indicators for the Motor and Medical insurance lines. Focus was made on these lines since they form the main risks retained by the Companies in Lebanon.

The analysis of the Motor branch was broken down between the following sub-lines:

- Motor Compulsory;
- Third Party Liability; and
- The Own-Damage and other Complementary Risks

On the other hand, we separated the Retail and Corporate Medical Insurance lines in the present report, hoping it gives a better analysis for the reader.

The indicators presented in the performance analysis and the corresponding methodology, are captured in the table below. The performance is assessed on an "Accident Year" basis and covers five years from 2010 through to 2014.

Table 1: Performance Indicators and Methodology

| | Source | Formula | Description |
|------|---------------|------------------------------------|---|
| (1) | A8 | | Number of subject matters at the beginning of the statement year |
| (2) | A8 | | Number of subject matters at the end of the statement year |
| (3) | | = AVERAGE((1),(2)) | Average number of subject matters during the statement year |
| (4) | A6 | | Gross Earned Premiums |
| (5) | A7 | | Number of closed claims at the end of the year 2014 |
| (6) | A7 | | Number of open claims at the end of year 2014 |
| (7) | | = (5) + (6) | Total number of claims at the end of year 2014 |
| (8) | A6 | | Gross paid claims net of settled recoveries at the end of year 2014 |
| (9) | A6 | | Gross outstanding claims as at end year 2014 |
| (10) | A6 | | Gross IBNER as at end year 2014 |
| (11) | A6 | | Gross IBNR as at end year 2014 |
| (12) | | = 3%*sum((9), (10), (11)) | Loss Adjustment Reserves |
| (13) | | = (8) + (9) + (10) + (11) + (12) | Expected Ultimate Claims as Reported Net of Settled Recoveries |
| (14) | A3 | | Ceded premiums net of reinsurance share in UPR |
| (15) | A3 | | Received commissions from the reinsurer |
| (16) | A7 | | Reinsurance share in claims paid |
| (17) | A7 | | Reinsurance share in OS claims and IBNR |
| (18) | Not Available | | Reinsurance share in profit sharing |
| (19) | | = (14) + (15) + (16) + (17) + (18) | Reinsurance balance |
| (20) | A3 | | Change in premium deficiency reserve |
| (21) | A3 | | Change in reinsurance share in premium deficiency reserve |
| (22) | | = (20) + (21) | Impact of premium deficiency reserve |
| (23) | A3 | | Commissions paid net of DAC movement |
| (24) | A3 | | Administration and other Operational Costs |
| (25) | A3 | | Income Taxes |
| (26) | | = (23) + (24) + (25) | Total Commissions and Expenses |
| (27) | | = (4)/(3) | Average earned premium per subject insured |
| (28) | | = (7)/(3) | Claims frequency |
| (29) | | = (13)/(7) | Average cost per claim |
| (30) | | = (28)*(29) | Burning cost |
| (31) | | = (13)/(4) | Ultimate loss ratio as reported |
| (32) | | = (23)/(4) | Commissions paid ratio |
| (33) | | = (24)/(4) | Operational Expenses Ratio |
| (34) | | = (25)/(4) | Income tax ratio |
| (35) | | = (19)/(4) | Reinsurance hedging cost ratio |
| (36) | | = (31) + (32) + (33) + (34) + (35) | Combined ultimate loss ratio as reported |
| (37) | | = (22)/(4) | Impact of PDR ratio |
| (38) | | = (36) + (37) | Combined ultimate loss ratio including impact of PDR |

1. MOTOR COMPULSORY

The performance analysis is presented in the following table.

Table 2: Motor Compulsory — Performance Analysis

| Production | | P) | | 2010 | 2011 | 2012 | 2013 | 2014 |
|--|------|----------------------------------|--------------------------|---------|-----------|-----------|-----------|-----------|

The table presented above allows the following observations:

- The number of vehicles insured went from 1.05 to 1.22m between end of 2012 and end of 2014 respectively, and the gross earned premium increased from 81.0bn LBP to 83.1bn LBP.
- Claims frequency is reasonably stable at around 0.7%, while claims severity increased from 3.2m LBP in 2012 to 6.4m LBP in

- 2014 driven by the new reserving requirements
- Average commissions net of DAC decreased from 46.6% to 43.9% between 2012 and 2014, while operational and administrative expenses went from 14.5% down to 12.5%
- The Ultimate Loss Ratio (ULR) increased from 26.7% in 2012 to 55.9% due to the introduction of a reserving mechanism whereby the ULR implied is not allowed to be below the threshold of 50%
- Premium Deficiency Reserves were required in 2013 as a result of the strengthening of the technical reserves

Several indicators are only available for 2013 and 2014 since this line was previously reported under the larger Motor Non-Compulsory designation. Such indicators include the commission paid, the administration and operational expenses, the movement in premium deficiency reserves; and the reinsurance ceded premiums.

The following observations can be made:

- The Gross Earned Premiums increased by 7.4% in 2011, 3.7% in 2012, 2.4% in 2013 and decreased by 2.2% in 2014, with total amount reaching 68,436 m LBP in 2014.
- Ultimate Claims increased by 10.5% in 2011, 8.8% in 2012, 15.3% in 2013 and 5.7% in 2014, to reach 51,166 m LBP.
- The loss ratio increased in 2014 as compared with 2012 and 2013 going up from 61.4% to 74.8%. This seems to be driven by a decrease in the premium as the average premium per vehicle went from 107 to 92k LBP.
- The average earned premium per vehicle insured was 92k LBP in 2014 with an estimated burning cost of 69k LBP.
- The above observations on ultimate claims and loss ratios rely to a large extent on the accuracy of the technical reserves established by the Companies, namely the reserves for claims outstanding and the IBNR.

Several indicators are only available for 2013 and 2014 since this line was previously reported under the larger Motor Non-Compulsory designation. Such indicators include the commissions paid, the administration and operational expenses, the movement in premium deficiency reserves; and the reinsurance ceded premiums.

The following observations can be made:

- Gross earned premiums increased by 11.9% in 2011, 13.7% in 2012, 5.1% in 2013, and 5% in 2014 with total amount reaching 363bn LBP in 2014.
- Ultimate claims increased by 5.2% in 2011, 10.1% in 2012, 10.4% in 2013, and 1.4% in 2014 to reach 223bn LBP.
- The average cost per claim increased by 6.2% in 2012, 2.9% in 2013 and 23.1% in 2014 going from 776k LBP in 2011 to 1,045k LBP in 2014.
- The loss ratio ranged between 60.6% and 61.4% over the last three years.
- The average earned premium per vehicle insured was 883k LBP in 2014 with an estimated burning cost of 542k LBP.

Figure 5: Gross Earned Premium and Ultimate Claims vs Ultimate Loss and Combined Loss Ratios

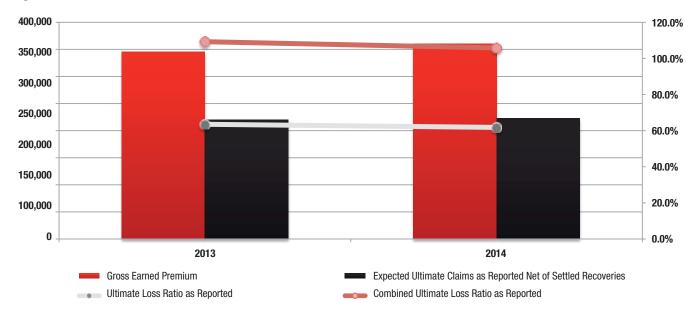

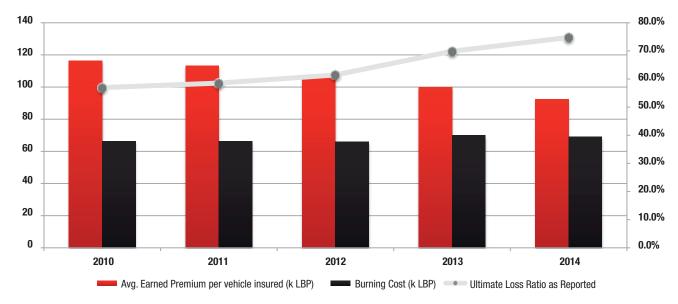

Figure 6: Avg. Earned Premium per Vehicle Insured and Burning Cost vs Ultimate Loss Ratio

4. INDIVIDUAL HEALTH

The performance analysis for the individual health is presented in the following table.

Table 5: Individual Health — Performance Analysis

The individual health business remains largely profitable with a loss ratio that increased from 54.9% in 2010 to 57.7% in 2013 and went down to 55.7% in 2014. While the average cost per claim grew in large proportions going from 539 to 687k LBP between 2010 and 2014, the burning cost driven by lower utilization went down from 581k LBP in 2010 back to 556k LBP in 2013 and 502k LBP as reported so far for 2014.

The gross earned premium for this line grew by 12.3% in 2011, 11.6% in 2012, 11.4% in 2013 and 7.1% in 2014 reaching 263bn LBP in this year. Ultimate claims grew respectively by 12.4%, 11.8%, 16.8% and 3.5% in the same years to reach 146bn in 2014. Commissions levels ranged between 15% and 18% over the past few years, which is well below the levels observed for Motor business. The cost of reinsurance hedging went from 8.0% and 9.0% in 2010 and 2011 down to 4.8% in 2012, 1.1% in 2013 and 3.3% in 2014. This positive shift, mainly due to a change in reinsurance programmes from proportional to non-proportional, was offset by the drift in loss ratio and the slight increase in commissions paid.

Figure 7: Gross Earned Premium and Ultimate Claims vs Ultimate Loss and Combined Loss Ratios

The gross earned premium for this line increased by 5.5% in 2014 to reach 379bn LBP while ultimate losses reached 337bn LBP up by 7.1% as compared with 2013. Average cost per claim increased from 371k LBP to 467k LBP while burning costs went from 653 to 708k LBP per member driven by lower frequency.

It should be noted that member information in 2010 and 2011 is not accurate as it referred for most companies to number of groups

rather than number of members. Therefore, the related series should be considered from 2012 onwards. This line continues to perform at loss with a combined loss ratio of 108.5% in 2014, implying technical losses of 32bn LBP.
